LUIZ FELIPE

Full Stack Software Engineer
Luizfelipep.s@outlook.com.br | GitHub: LuizFelipePSIlva | LinkedIn: LuizFelipe | Mossoró - RN

SKILLS

- Languages: TypeScript, JavaScript
- Frameworks: NestJS, Node.js, Express, Fastify, Angular, React
- Databases and ORMs: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Prisma
- Messaging: RabbitMQ, MQTT
- Cloud and DevOps: AWS, Docker, GitHub Actions, CI/CD
- AI: AI Agents, RAG, LLM Integration

EXPERIENCE

Alphabet Sphere LDA - Portugal - Remote

Full Stack Developer Oct 2025 - Oct 2026

- Designed the backend architecture of an IoT platform for aquaculture monitoring, with a physical station integrated via MQTT and simulations to validate scenarios before deployment.
- Reduced deployment time from 3 min to 1.2 min by automating migrations and state verification, and stabilized the pipeline by fixing recurring build failures.
- Reduced application startup time from 2,000 ms to 200 ms, reducing the number of redundant processes and checks in production.
- Implemented real-time anomaly detection based on per-sensor parameters and AI agents with RAG for querying production data, automating operational reports and e-mail personalization based on the anomalous parameters.
- Built modular web interfaces in React and Vite for operational data visualization and real-time alerts.
- Technologies: TypeScript, NestJS, React, Vite, PostgreSQL, MQTT, Docker, AWS, OpenAI API

SaborSync - Brazil - Remote

Founder & Software Engineer Jan 2025 - Sep 2025

- Conceived and developed a multi-tenant SaaS platform for food service operations management, supporting multiple establishments.
- Reduced critical query response time from 900 ms to 129 ms with distributed caching (Redis).
- Implemented asynchronous notification and e-mail delivery in production with RabbitMQ and MongoDB.
- Designed the cloud infrastructure and automated integration, testing, and deployment (CI/CD).
- Developed a support chatbot for users and customers with AI agents.
- Built Angular admin interfaces for multi-tenant operations management.
- Implemented unit tests with Jest at 90% coverage, plus integration and e2e tests.
- Owned technical decisions, product evolution, and production platform maintenance.
- Technologies: TypeScript, NestJS, Angular, PostgreSQL, Redis, RabbitMQ, MongoDB, Docker, Jest, OpenAPI

Compass UOL - Brazil - Remote

Backend Engineering Intern Aug 2024 - Jan 2025

- Developed 3 REST APIs for enterprise systems, integrating previously disconnected workflows and eliminating manual processes.
- Automated build, testing, and deployment via CI/CD pipelines integrated with AWS.
- Implemented containerized environments integrated with relational databases.
- Led a team of 5 people in the development of a dealership management system.
- Technologies: TypeScript, Node.js, PostgreSQL, MySQL, Docker, AWS EC2, GitHub Actions, Jest

EDUCATION

Bachelor's Degree in Computer Science

Federal Rural University of the Semi-Arid Region (UFERSA) May 2024 - Dec 2027 (in progress)

CERTIFICATIONS

AWS Cloud Practitioner (CLF-C02) — Amazon Web Services Training and Certification, Feb 2025

LANGUAGES

Portuguese - Native
English - Intermediate
