

LUIZ FELIPE

Luizfelipec.s@outlook.com.br · GitHub: [LuizFelipePSilva](#) · LinkedIn: [LuizFelipe](#) Mossoró - RN

Professional Summary

Software Engineer focused on backend development, distributed systems, and SaaS/IoT platforms. Experience designing and building cloud-native applications, real-time data processing systems, and LLM-powered solutions, from domain modeling and infrastructure design to deployment and production operations.

Professional Experience

CNPq (Brazilian National Council for Scientific and Technological Development)

Remote

Backend Engineer

Sep 2025 - Present

- Designed the backend architecture of an IoT platform for aquaculture monitoring and real-time operational data processing.
- Developed ingestion and storage pipelines for telemetry data collected from field sensors.
- Implemented anomaly detection mechanisms and automated operational alert generation.
- Automated operational reporting and developed natural language agents for querying production data.
- Contributed to business rule definition, deployment processes, and continuous platform evolution in production.
- Technologies: TypeScript, NestJS, React, PostgreSQL, MQTT, Docker, AWS, OpenAI API

Freelancer

Remote

Founder & Software Engineer

May 2025 - Present

- Conceived and developed a SaaS platform for food service operations management.
- Modeled business domains and designed a multi-tenant architecture supporting multiple establishments.
- Developed backend services, administrative interfaces, and distributed caching mechanisms.
- Designed cloud infrastructure and automated integration, testing, and deployment workflows.
- Led technical decisions, product evolution, and production platform maintenance.
- Technologies: TypeScript, NestJS, Angular, PostgreSQL, Redis, Docker, AWS, GitHub Actions, Jest

Compass Uol

Remote

Backend Engineering Intern

Sep 2024 - Feb 2025

- Developed REST APIs for enterprise systems using layered architecture principles.
- Automated build, testing, and deployment processes through CI/CD pipelines.
- Implemented containerized environments integrated with relational databases.
- Collaborated within agile teams delivering features, bug fixes, and continuous improvements.
- Led the development of a dealership management system.
- Technologies: TypeScript, Node.js, PostgreSQL, MySQL, Docker, AWS EC2, GitHub Actions, Jest

Education

Federal Rural University of the Semi-Arid Region (UFERSA)

May 2024 – Dec 2027

Bachelor's Degree in Computer Science

Certifications

AWS Cloud Practitioner (CLF-C02)

Feb 2025

Amazon Web Services Training and Certification

Competências

- **Languages:** TypeScript, JavaScript, Java
- **Frameworks:** NestJS, Node.js, Angular, React
- **Cloud & DevOps:** AWS, Docker, GitHub Actions
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **AI:** AI Agents, RAG, LLM Integration, LLM Security
